

Physics 2D, Winter 2005

Instructions for Quizzes

The first quiz:

1. Bring a blue book.
2. Tear off the bottom half of the code number page from your quiz. Put it in your Physics 2D folder. You will need it to see your scores online and to put on all of your quizzes.
3. Write your name on the top half of the code number page and turn it in separately at the front of the room.
4. Listen to announcements made by the proctors, T.A., professor, et al.
5. Take your quiz. Write your scratch work in pencil. Write your answers in indelible ink, including showing your work and explaining your thinking. Write your code number clearly on every single page.
6. Take your quiz to the front when you are done or when the T.A. announces that time is up. Put your blue book in the correct pile (1-50 will be on the left, 51-100 will be in the middle, 100-155 will be on the right).
7. You are free. Enjoy your weekend, or else.

The rest of the quizzes:

1. Bring a blue book and your code number.
2. See 4 through 7 above.
